

Guardian.NET Secure Enhanced File Transfer (SEFT) hosting is for those clients who prefer to have InterTech USA manage their file transfer process and ensure a high level of security for sensitive transactions.

Standard FTP services are highly insecure by design allowing usernames, passwords and data to be sent over the internet in clear text and subject to theft and abuse. In addition, standard FTP services are difficult and time-consuming to manage with little potential for deployment of automated services such as event notifications.

Guardian.NET SEFT addresses all the limitations of standard FTP in an easy to use and quick to deploy hosted service.

Companies that take advantage of Guardian.NET SEFT protect not only their own assets and individual identities, but also their clients and trading partners as well.

Guardian.NET SEFT also offers extensive event rules making automated file transfers secure, easy to deploy and reliable.

The system is easily configured and managed through a Windows 2003 application offering complete control of usernames, passwords, authentication methods, available processes and more.

This service is ideal for businesses of any size that benefit from a semi-dedicated server that features a limited number of domains. Compared to shared hosting that is offered by most ISPs and features an unlimited number of domains, this semi-dedicated server ensures equitable resource availability without the higher costs and management responsibilities of a fully dedicated server.

Guardian.NET is also an ideal service for financial and healthcare industries, as well as other businesses that are required to comply with the Gramm-Leach-Bliley Act (GLB), the

Health Insurance Portability and Accountability Act (HIPAA), the Sarbanes-Oxley Act, and the Patriot Act. This hosting service includes high security designed to protect not only the content and the transaction, but also the privacy of an institution's clients and their confidential information. E-commerce sites also benefit from additional services, such as high encryption of credit card numbers and ACH transactions and methods enforcing stronger and more secure passwords.

Proactive monitoring, firewalls, regular security scans and audits, as well as host and network intrusion detection and long-term access log storage and retrieval make this a perfect secure solution at a fraction of the cost for deploying and maintaining secure solutions in-house, or with other providers.

InterTech USA deploys a network architecture designed to offer up to 99.999% high-availability, ease of use, and security that approaches military standards. This means that any device or service connecting to our system will experience faster, more secure, highly reliable and predictable connections. There are no single points of failure from our data center to the Internet backbone. For every core router, switch, IDS sensor, and firewall there is another device actively participating in the network load and processing. This architecture compliments our main multi-homed circuits to the Internet backbone. These are also actively fault-tolerant and load-balanced.

Redundant firewalls with multiple demilitarized zones add substantial protection to the network itself by allowing us to customize and segregate different functions within different zones, thus increasing reliability and security. InterCORE also provides substantial monitoring, logging, and diagnostic tools, including pro-active network intrusion detection systems (IDS) that identify and automatically terminate attacks and viruses on the network before any damage can occur.

This high security hosting system also makes a server and its data virtually unresponsive to port scans, icmp sweeps, and other automated scanning systems that hackers may use to identify possible vulnerabilities prior to an attack. By masking certain resources, high encryption of all sensitive data, blocking all unnecessary ports, and limiting third-party access, InterTech USA offers a secure solution

which meets or exceeds privacy standards in any industry.

Experienced technical support is also included with our email case management system and extensive knowledgebase.

InterTech USA is committed to your success and we make sure that all the details are taken care of for your benefit. Current software supported lists, version numbers, pro-active notifications, extensive real-time monitoring and communications, to mention only a few features, are available 24x7.

At InterTech USA, it is our job to make sure everyone is on the same page by the close of each business day; just another way of helping you Go Beyond!

Guardian.NET Secure Enhanced FTP Benefits

Guardian is ideal for exchanging data between trading partners, clients, suppliers, remote employees and/or customers. It ensures reliable and secure transactions with data integrity verification over industry standard security protocols. SEFT is the smart choice for organizations seeking to:

- Exchange data with partners and clients over multiple secure protocols
- Automate workflow and application integration
- Protect data during transport and while stored on disk
- Guarantee transfer of mission-critical files
- Perform transparent “clientless” partner transactions
- Audit and report on transactions throughout their life-cycle
- Meet stringent regulatory requirements including HIPAA, Graham-Leach-Bliley, and Sarbanes-Oxley

Guardian.NET Secure Enhanced FTP Features

- Multi-protocol support: FTP, FTPS (SSL), SFTP (SSH2), HTTP and HTTP Secure
- Post-transaction processing and workflow automation using configurable event rules
- Guaranteed delivery (automatic and manual resume) and data integrity validation
- OpenPGP based and transparent streaming encryption
- Data push (offload) and pull (retrieve) to/from remote inboxes
- Non repudiation through granular transaction auditing and reporting
- Complete programmatic interface
- Local and remote secure administration
- Configurable user, group, account, and site settings

Services Agreement

This Agreement is between InterTech USA, Inc. and Client. Client hereby asserts that Client has the full authority to order services from InterTech USA. This Agreement may be executed in counterparts, depending upon actual services ordered by the Client. Each such counterpart, when required, shall be deemed to be an original, but all of which when taken together, shall constitute one Agreement. A counterpart includes, but is not specifically limited to, a Service Agreement (SA), Custom Development Agreement (CDA), Custom Development Document (CDD), Custom Development Specification (CDS), Change Order (CO), Work Order (WO), Fee Schedule (FS), Technical Support Case (TSC), Service Level Agreement (SLA), Copyright Notice (CN), Acceptable Use Policy (AUP), Privacy Policy (PP), and Addenda to the forgoing. Client acknowledges and agrees to the terms of this Agreement and its counterparts. Client acknowledges that the policies contained herein are subject to change without notice with the current versions posted on our web site at <http://www.intertech-usa.com>.

InterTech USA agrees to provide services as ordered by Client for the terms selected by Client. InterTech USA agrees that these services will be deployed on systems according to the Service Level Agreement (SLA) and account type selected by the Client. InterTech USA accepts no liability for its failure or failure of any third-party, for any cause or reason, including but not limited to, an Act of God, action by any governmental or quasi-governmental entity, fire, flood, insurrection, riot, explosion, embargo, strike, whether legal or illegal, labor or material shortage, transportation interruption of any kind, work slow down, power interruption, hardware failure, phone service interruption, Internet service provider failure or error, illness or disability of owners or employees of InterTech USA, or any other condition beyond the control of InterTech USA, which may affect delivery of services in any manner. InterTech USA does not warrant or guarantee that any particular service designed, published or deployed by InterTech USA or any other third party will be useable or error free. Client understands that all work and services are provided without any representations either expressed or implied and Client should consult the Service Level Agreement (SLA) for the services provided for additional information. InterTech USA will not knowingly permit our services to be used for any unlawful purpose. This specifically includes, but is not limited to, unsolicited bulk email, spoofing, the offering or solicitation of illegal substances, the offering or solicitation of illegal activities, such as computer crimes or hacking, the offering or solicitation of computer files that are protected by copyrights, trademarks, or other creative rights, or the display, linking, offering or solicitation of lewd or pornographic material.

All Work Orders (WO) and Technical Support Cases (TSC) are scheduled on a first-in first-out basis and are scheduled only after all the required information is received from Client. Projects and tasks approved for live or production deployment after 1:00 PM MST Thursday will not be deployed for any reason until the following Monday to ensure adequate time and resources are available for a successful deployment. Clients have around the clock access to their complete account information, work order status, case status and other resources online. All orders for work regardless of type are entered into this system and are not valid nor scheduled until agreed upon and validated by Client. Work orders will not be accepted by email.

Professional Consulting Group (PCG) invoices are sent at the end of each month for that month's services. Internet Services Group (ISG) invoices are sent at the beginning of each month for that month's services. Client agrees to pay all charges for when due. Payments not received by the due date on the invoice will be considered past due and all services will be subject to termination at the discretion of InterTech USA upon reaching 31 days past due. A 1.5% per month late fee will be charged on all past due accounts along with a \$25.00 one-time processing charge for late payments, additional invoice copies, nsf checks, wire transfers, dishonored credit card or ACH payments. Upon account termination, any Client files, email, and data residing on InterTech USA servers or backup systems may

be permanently deleted and non-recoverable. Clients who desire to keep their files must notify us at time of cancellation and make special arrangements for delivery. Client may only re-establish services by bringing all past due accounts current and by ordering and paying in advance for new services as a new Client. Should InterTech USA deem it necessary to use any third party in order to collect any fees due to InterTech USA for work and/or services performed, those collection fees will be paid by Client. Should Client cancel an account under contract prior to the expiration of that contract, the full amount of that contract will immediately become due and payable based upon the then in effect month-to-month rate for service. All service cancellations will become effective at the beginning of the next month after receipt of a written or faxed notification to InterTech USA that positively identifies Client. Positive identification is agreed by both parties to be notification on Client's letterhead and signed by the designated administrator or officer of the company. A verbal or email cancellation or notification by Client or another provider or vendor will not be accepted under any circumstances. Upon contract expiration, billing will automatically revert to the then-in-effect month-to-month rate for service until a new contract is executed. There are no refunds for services paid in advance due to early cancellation.

When visiting InterTech USA servers, Client is expected to respect the conventions, courtesies, and rules of use, which govern communications on the Internet. Some examples would include, but are not limited to, refraining from harassing, flaming, spamming, sending unsolicited email, spoofing, denial-of-service, threatening, or tormenting any other user or group of users. Client agrees to use an opt-in policy regarding bulk email and understands that Client may be held responsible for each piece of unsolicited email sent by Client from our email system. Client will not post or transmit any unlawful, offensive, inflammatory, or prohibited communication or material of any kind. Client may not use InterTech USA servers or services to encourage, conduct or agree to any activity that would constitute a criminal or civil offense. Links to/from any InterTech USA servers to/from any servers containing objectionable or pornographic materials are strictly prohibited. Any Client linking to/from such sites will be terminated without refund, without re-establishment of service, and without notice. Client acknowledges that it is solely responsible for any and all information that Client deploys or orders InterTech USA to deploy for Client on the Internet.

Client represents that it and/or its agency has the right and/or permissions to deploy through the Internet, the contents thereof and is not in violation of any copyright. Client agrees to hold InterTech USA harmless regarding deletion, loss, or corruption of any data for any reason. Client consents to periodic monitoring of Client's use of these services, for purposes of quality control or to measure Client's compliance with the terms of this Agreement. Client also agrees to maintain hardware, software, and telco equipment on Client's premise in good working order and acknowledges that InterTech USA is not responsible for the foregoing under any circumstances unless included in the service ordered.

Client understands that all IP (Internet Protocol) addresses assigned to Client by InterTech USA remain the property of InterTech USA and are not transferable. Client agrees that any account includes only services for one company, organization, person, or business entity. Concurrent (simultaneous) logons using the same account and/or software and presence for anything other than a single entity is subject to the terms and conditions as a separate account and will be billed to Client automatically according to the current Fee Schedule. Client may not assign accounts to a third-party unless arrangements are made in advance and those accounts are current. Client also agrees to refrain from disclosing usernames and passwords to any other parties. InterTech USA's hours of operation are from 9:00 AM to 5:00 PM MST Monday through Friday, excluding holidays. Emergency services requests are accepted during off-hours and will be billed at a mandatory 1.5 times the standard rate and minimum increment regardless of cause or nature. All charges for all services will begin as of the date of first service.

Client is responsible for payment for services even if Client never uses the services regardless of reason or cause.

InterTech USA, Inc. makes significant efforts to keep all data confidential in compliance with the Gramm Leach Bliley act, Title V. We will not disclose confidential data to any third party without the written permission of the rightful owner of that data. Furthermore, our staff, contractors and clients have all entered into written contracts with InterTech USA, Inc. to keep this data confidential. We use industry-standard efforts and best practices to safeguard the confidentiality of all information, regardless of whether it identifies you or not. Our security includes use of application proxy servers, firewalls, access control lists, secure socket layers, and encryption and other measures. Your password is a component of our security system. As such, it is your responsibility to protect it. Do not share your password with any third parties. If your password has been compromised for any reason, you should change it immediately. . For additional details on our Privacy Policy and Acceptable Use Policy, please visit our website.

THIS AGREEMENT IS SUBJECT TO ARBITRATION. If a dispute arises with respect to this Agreement or the services provided under this Agreement, either party may submit the dispute to an arbitrator selected by the parties or selected in accordance with the Uniform Arbitration Act, as enacted in the State of Montana. Each party agrees to comply and obey all federal, state and local laws applicable to the use of the Internet, and the text and other material transmitted on the Internet. No conditions shall be binding on InterTech USA unless specifically agreed to in writing by InterTech USA and attached hereto and made a part hereof. This Agreement supersedes all previous Agreements regardless of source. The current version of this Agreement is available for public review on our website and will be amended from time to time with all amendments and modifications binding as the original signed Agreement. For the purposes of resolving conflicts that could arise out of this Agreement, all parties agree that the Laws of the State of Montana shall govern this Agreement and that the place of performance of this Agreement is Missoula, Montana. I, as Client, have read and agreed to all the terms and conditions contained herein and in any Addenda to any of the forgoing. I understand the risks that can result from an Internet presence and agree InterTech USA offers no guarantee, warranty, or assurances that services provided will prevent any and all kinds of attacks, intrusions, denial-of-service, or any other anomalies and InterTech USA will not be held responsible for any damages incurred.

I have read and agreed to the InterTech USA Services Agreement and authorize you to charge my credit card or debit my checking account for the services ordered for the full term selected. There are no refunds for early cancellation for any reason. This authority is to remain in full force and effect until written notification of its termination is received by InterTech USA, Inc. in such time and manner as to afford a reasonable opportunity to act upon the request. Prices do not include concept, design, creative, consulting, programming, development services or taxes. All quotations are void after 30 days. Prices, packages, and features subject to change without notice.
