

With increasing concern over mechanic's liens and construction losses, banks, savings and loans, lenders, title underwriters, title agencies disbursing operations, owners and contractors are becoming more cautious regarding construction funds control management.

OnTRACK Construction Risk Management Protection (CRMP) is a complete and "best in class" lifecycle management solution for construction escrow, disbursing, loan servicing and risk management. OnTRACK has been designed to minimize unnecessary exposures within the construction process and to streamline the necessary paperwork and legal requirements.

OnTRACK is used by title agencies, disbursing companies, underwriters and banks throughout the United States and since 1985 has been a proven and time-tested solution to successful management of the entire construction process.

OnTRACK CRMP:

- Generates all of the proper documentation including construction loan agreements, contractor worksheets, affidavits, security agreements and inspection reports;
- Handles contractor, subcontractor and vendor payments;
- Facilitates the collection and tracking of lien waivers;
- Stores all documents and images relating to the order and offers easy retrieval;
- Monitors all transactions and enforces user-defined rules for disbursing;
- Automates and validates the entire draw process;
- Tracks construction loan hard and soft cost and all line item budgets;
- Generates extensive reports on all disbursing activity;
- Significantly increases end-user productivity;

The OnTRACK Secure Web Portal is a companion product to OnTRACK CRMP and adds accessibility and collaboration by ensuring real-time information is instantly and securely available to the bank, title company, borrower and contractor. Inspectors can enter inspections with images, owners can approve draw requests and vouchers, lien waivers can be processed online or via PDA and much more. This offers you and your clients substantial time savings and convenience.

The entire system is easy to learn and easy to use with all features and functionality contained in a single program which provides a consistent user interface throughout.

OnTRACK CRMP is available in five scalable versions as well as hosted software-as-a-service, OnTRACK CRMP Live, and is affordable for any size disbursing operation. The entire system includes support services provided by professionals with years of experience.

For banks, contractors, title companies, owners or title agents, OnTRACK provides a whole new level of control and peace-of-mind. Because of the completeness and simplicity of the program, OnTRACK can be used for any size job -including new homes, commercial buildings and complete subdivisions.

No more vouchers, mountains of paper, spreadsheets and word processor documents. OnTRACK provides everything you need in a single and easy to use application.

Contractors Love it...

OnTRACK makes a contractor's life easier by automating the voucher system and by streamlining subcontractor payments. The contractor can simply write the appropriate line code right on the invoice for payment or enter the information online. A contractor's main concern is completing the project. He needs to get the right people paid at the right time, and he needs to make sure he has enough money to finish the job.

By using OnTRACK, the contractor can be certain that subcontractors are being paid and everything is being tracked appropriately. Since the system will not allow the contractor to overrun the budget

without submitting a change order or budget adjustment, he can be certain that he will not overrun by mistake. At any time, the contractor can find out who has been paid, for what job and the amount. With Internet access and a laptop computer, the contractor can have up-to-the-minute reports on how much money is left in any line category or the project as a whole.

Know exactly where the money is, how it is being spent and if you are on budget.

Bankers Trust it...

To avoid losses and incomplete projects, banks need to know that each construction loan is being disbursed appropriately, and that a contractor is not spending money from one project on another. With OnTRACK, banks know exactly how much has been spent on what items at every moment. In addition, OnTRACK can produce all of the legal paperwork required to maintain compliance as well as lien waiver tracking. OnTRACK ensures that each project is virtually risk-free.

Automatic handling of all necessary paperwork and complete control over disbursing.

Title Companies Need it...

Title agents and disbursing companies need OnTRACK. The program gives them the control they require over the entire process. Because OnTRACK makes title companies and banks more comfortable with a loan, title agents and disbursing companies that use OnTRACK should find it to be a competitive edge in the marketplace.

In addition, using OnTRACK reduces costs compared to other systems by computerizing the voucher system. Instead of maintaining detailed books on forty lines for a dozen projects, each item is entered into the system only once.

OnTRACK facilitates the collection of lien waivers, checks for available budget, reduces the appropriate line budgets, prepares the checks and handles all necessary paperwork. And because OnTRACK does away with the voucher system, contractors are quick to comply with the payment system--giving your company financial controls that are unparalleled in the industry.

“Nothing compares to OnTRACK. We have been using this system for over ten years and it handles all aspects of our disbursing business. I highly recommend OnTRACK to anyone who wants to stay one step ahead of the competition.”

B.W., U.S. Title Division of Realty Corporation.

New Home and Building Owners will appreciate your company for offering it...

OnTRACK provides new owners of residential and commercial buildings substantial security and peace of mind during the construction process. The value added to your company sets you apart from your competitors.

Flexible services and deployment options make it easy to cash flow your operation quickly.

Budgets:

At the start of any project, the contractor determines the budget for each line category. The system will then track and maintain balances for each of the budget categories. When a contractor wants to overspend a line, he is forced to submit a

budget adjustment and, if necessary, the additional funds from the owner.

Vendor Payments:

OnTRACK allows you to produce vendor checks with the knowledge that funds are available and that each budget line item has a sufficient balance. Simply enter invoices into the system. The program verifies that the appropriate budget is available and that sufficient funds have been drawn from the bank. Once these conditions are met, you can print vendor checks right from the software.

OnTRACK can integrate easily into your existing network and requires minimal IT resources to maintain.

Lien Waivers:

OnTRACK facilitates the collection of lien waivers. Each time a check is created, the system can automatically create reminder postcards and emails to prompt subcontractors for lien waivers. The program handles all kinds of waivers including subcontractor and subcontractor supplier as well as secure electronic online submissions.

Legal Documents:

OnTRACK produces all of the legal documents in the construction process, including:

- **Construction Loan Disbursing Agreement;**
- **Detailed Construction Cost Breakdown;**
- **Complete Lien Waiver Production and Tracking;**
- **Recap of the construction Lender's Loan identifying all loan debits; and**
- **A complete list of charges.**

This flexible system allows you to track the loan, as well as security agreements, affidavits and reports, so you can make changes and customize each project.

Tracks the exact status of each loan and funding source.

Bank Loan Management:

At all times, OnTRACK has accurate records on each loan--the original loan amount, any amounts received and the available balance. In addition, the system makes it easy to draw money from the bank only as needed, which reduces the interest expense on the loan. The program will even track how long a bank takes to pay, which allows you to take the delay into account when requesting additional funds. 3-way reconciliation of all accounts assures accuracy and compliance.

Special reports make the inspection process more efficient and thorough.

"The web portal has helped to significantly decrease the demands on our call center. Our customers appreciate the convenience and high security." R.T., Chicago, IL.

Inspection Reports:

OnTRACK automatically generates detailed inspection reports, which give the building inspector all of the information he needs to review the work and see if items are completed that have been invoiced. The system provides a percentage of completion on all major lines, which helps the inspector to catch any problems that might exist--such as 100% of the foundation budget being spent when, in fact, the foundation has not even been poured.

Flexible and intuitive reports provide everyone involved with the right information.

Disbursing Activity Reporting:

OnTRACK generates reports at all levels of company production: by individual job, subdivision, or even the entire company (which may encompass many subdivisions). Reports for your clients can also be made available using the Internet and the built in web server or created on-the-fly in Adobe PDF format and sent via email.

Subcontractor Reports:

At any time, OnTRACK can provide information on all invoices, payments and activity for any job or group of jobs. For example, you can see how much you have paid a particular plumbing contractor

from April through June of this year for all jobs. This is especially helpful if the subcontractor has applied a payment to the wrong job. When a subcontractor calls, you can know within seconds if the check has been issued.

Handles all aspects of construction loan disbursing including managing all of the paperwork.

Optional Built-In Web Portal for Anytime, Anywhere Reporting:

Banks, Contractors and Title Companies can all be set up with secured web access to the OnTRACK web portal system, which allows them to log on to the OnTRACK system using their office or laptop computer and the Internet. In this way, all of the information on their specific projects is always immediately available. This is especially important for the contractor, since it gives him tighter control over all of his projects. He knows the status of each job to help him control costs and monitor budgets and completion. Inspectors can enter inspection reports as well as upload digital images which are then immediately available for review.

Management Reporting:

OnTRACK prepares a wide range of internal management reports which provide efficient and timely information on all phases of the Construction Disbursing process. Easy searching and on the fly reporting allow gathering of any type of data within the system making management reporting easy, efficient and accurate.

Flexible, multi-level passwords protect documents, reports and sensitive information. Data encryption and two-factor authentication insure security and compliance.

Passwords and Access:

OnTRACK provides a flexible and comprehensive password protection system. Each user has a unique password so you can be certain that everyone has access to the information needed without worrying about unauthorized changes or inquiries. And two-factor authentication can be deployed quickly and easily without any inconvenience to your customers.

About InterTech USA:

InterTech USA, Inc. has been producing innovative software and services solutions for over 20 years. In fact we developed our first construction escrow and disbursing system in 1985.

We are a committed team of professionals with extensive experience in banking, real estate development, building, disbursing, title operations and computer science. With this combination of talent and common vision, InterTech USA, Inc. has developed the OnTRACK system to insure the success and integrity of your operation.

OnTRACK Offers Comprehensive Benefits to Your Company and Your Customers:

Minimize Risks	Centralize Processes	Increase Productivity
Secure Transactions	Scale for Growth	Maintain Compliance
Reduce Timelines	Deliver Accuracy	Increase Satisfaction
Service Effectively	Grow New Markets	Maintain Audit Trails

Installation, Training, Service and Support:

OnTRACK CRMP includes free remote installation and basic end-user training. In addition, the first 30 days of technical support and updates are also included at no additional charge.

InterTech USA offers a wide variety of service and support plans for OnTRACK CRMP designed to meet the unique needs and requirements of your company. Each installation comes complete with clear and easy to follow end user documentation and in-context online help. Our experienced staff is available to you by phone, email and our online case management system to assure that your issues and questions are addressed promptly. On site and remote access management and training are also available.

“OnTRACK was setup and deployed in about two hours. Your support staff is well-trained and knowledgeable and our clients love the web portal.” A.R., Chicago, IL.

On TRACK CRMP Construction Management System Features:

- ✓ Budget Adjustments and Transfers
- ✓ Individual and Company Wide Events and Calendars with Notifications and Task Management
- ✓ Email History and Logging
- ✓ Internal and External Memos and Notes
- ✓ Web Access Logging and History
- ✓ Construction Costs Breakdown with Hard and Soft Costs
- ✓ Clairvoyant Searching with Quick Sorting Across Multiple Tables Makes Data Entry Quick and Easy
- ✓ Construction Disbursement Certificate and Loan Charge Recap
- ✓ Draw Requests and Receipts
- ✓ Contractor, Sub-Contractor, and Vendor Payments
- ✓ Disbursements Journal
- ✓ Disbursing Agreements and Contractor Affidavits for All 50 States
- ✓ IRS "FIRE" System Compliant Electronic 1099 Filing and Two-Up Form Printing
- ✓ Email Reports and Notifications
- ✓ Import and Export Capability with Your Existing Software Systems Including QuickBooks
- ✓ Inspection Reports and Results with Images
- ✓ Default and Contractor Specific Breakdown Codes with Import
- ✓ User-Defined Documents, Re-Useable Document Templates and Fields
- ✓ Built-In Default and User-Defined Breakdown Codes and Breakdown Import
- ✓ Lien Waiver Generation for Materials and Labor and Status Tracking for All 50 States
- ✓ Fee for Services Tracking
- ✓ Automatic Post Card Generation for Lien Waivers and Checks
- ✓ Multiple Funding Sources with User-Definable Priority
- ✓ Line Item Budgets
- ✓ Label and Check Editor
- ✓ Archive System Preserves Essential Historical Data
- ✓ Built-In Backup System Ensures Your Data is Safe
- ✓ Change Orders
- ✓ User-Definable Retention with Status Reporting
- ✓ Blank and Pre-Printed Check Stock Support
- ✓ MICR Printer Support
- ✓ Cost per Square Foot and Cost to Complete in Real-Time
- ✓ Loan Balance Tracking
- ✓ Over 50 Presentation-Quality Pre-Defined Reports
- ✓ Innovative On-The-Fly Custom Report Wizard and Editor with Powerful Query and Sorting Capability
- ✓ XML Support for Third-Party Payment Transactions such as American Express
- ✓ Budget Adjustments and Transfers
- ✓ Presentation Quality Report Module
- ✓ MS Word and Excel Import and Export for Existing Forms and Documents
- ✓ Adobe PDF Built-In Provides for Easy Generation of Any Report to PDF
- ✓ 3-Way Reconciliation Between Book Balance, Bank Balance, Trial Balance and External Ledgers
- ✓ Built-In Document Management with User Selectable Internal BLOB Storage or External File Share
- ✓ Supports Multiple Bank Accounts with Complete Online Reconciliation
- ✓ 64 Bit or 128 Bit High Encryption Built-In for Client-Server and Web Portal
- ✓ Complete Audit Trail and Transaction Logging
- ✓ Fully Integrated with FiServ
- ✓ In Context Help and Online Documentation
- ✓ User-Definable Over Disburse Limit and Loan to Inspection Ratio Limit
- ✓ Color-Coded Warning and Informational Fields
- ✓ Funding Summary Available from Any Relevant Window
- ✓ Draw and Voucher Approvals

On TRACK CRMP Construction Management System Optional Components:

- ✓ **ConnectivityPack:** ODBC Connectivity and Import/Export for Data Access to Your Other Systems.
- ✓ **CustomPack:** Software Customization and System Integration to Your Business Specification.
- ✓ **ExcelPack:** Built-in Excel Spreadsheet Module for Data Management
- ✓ **FontPack:** E-13B MICR Fonts and Secure Numeric Anti-Fraud and Text Fonts.
- ✓ **ReportPack:** Over 25 Additional Presentation Quality End-User Customizable Reports with New Reports Added Each Quarter. Includes Contractor Affidavits and Lien Waivers for all 50 US States.
- ✓ **ScanPack:** Document Imaging, Scanning and Retrieval Module for Any TWAIN Compliant Scanner and Digital Camera. Fully Integrated with the OnTRACK File Cabinet.
- ✓ **TransactionPack:** PGP Module with Encryption, Authentication and Two-Factor Authentication for Web Portal, Email and FTPS Services. Includes PositivePay, Scheduler, EFT and ACH Support with Online Checking Account Reconciliation.
- ✓ **WebPack:** Secure and Brand-able Web Portal for Vendors, Contractors, Owners, Inspectors, Lenders and Title Agencies with Extensive Security and Privacy features, Web Access Tracking, Voucher Uploads and Approvals, Draw Requests and Approvals, Inspections with Image Upload, Reporting, Checking, Receipts, Orders, Budget Transfers and Current Status. Easily and Conveniently Accessible from Home, at the Office or in the Field Using a PDA with Windows Mobile OS.
- ✓ **WordPack:** Built-in Word Processing Module for Agreements, Affidavits and Releases.

Available Versions and Deployment Options:

OnTRACK CRMP is effortlessly scalable and available in five versions. OnTRACK CRMP is also available as Software As A Service (SaaS) and is fully secured and managed by InterTech USA in our own data center. This offering provides for low cost of entry and can be deployed in a matter of days. OnTRACK CRMP Live requires minimal local IT resources and is ideal for smaller and mid-size operations.

The optional OnTRACK Secure Web Portal can be configured as read only or interactive on a user by user or company-wide basis with local or hosted deployments. And InterTech USA can customize and integrate the web portal to add substantial value to your existing web site.

Each version is quickly upgradeable to meet the growing needs of your company. From single user workstation systems for smaller operations to multi-user networked workstations, OnTRACK has you covered and protects your investment.

Screenshot of Lien Waiver Collections>>Current Status:

The screenshot shows a software window titled "Lien Waiver Collections". It features a search bar at the top with "ID" and "is" dropdown menus, a search icon, and a "Find" button. Below the search bar is a table with the following columns: Code, Date, Number, Vendor, Amount, Lien Waiver, Collected From, and Released To. The table contains several rows of data, including entries for ROCK QUARRIES, INC., THE SPRINKLER CO, H & R ENTERPRISES, Home Depot, KIRKLAND WATER CO..., STATE STEEL & SUPPLY, TRANSFER FROM CASH, and HARRIS ENGINEERING. At the bottom of the window are buttons for "Update Selected Records...", "Email...", "Print...", and "Done".

Code	Date	Number	Vendor	Amount	Lien Waiver	Collected From	Released To
383838	07/27/06	16	ROCK QUARRIES, INC.	250.00	Material		
383838	07/26/06	15	THE SPRINKLER CO	1,250.75	Labor	THE SPRINKLER CO	THE SPRINKLER CO
